

USER SCENARIO – SPECIALIST DOCTOR

The specialist doctor will sign in using his ID and password. The moment he signs in, in front of him will appear the homepage which contains a list of that day's appointments. For each appointment the doctor will be shown information on that appointment such as basic patient data and time of meeting and also two buttons: "Finish" and "Cancel". "Finish" will approve that the visit was finished and a new page will open which will contain a form for the doctor to fill about that visit such as description, prescription or upload analysis etc. The "Cancel" button will cancel that appointment and alert the patient through an email or a text message. There will also be a "New" button to create a new appointment. Another page accessible through the menu on the top of the pages is "Patients" that will open a page containing the list of all patients of this doctor in the form of a table. For each patient, besides their basic data, there will be the buttons: "Records", "Edit", and "Delete". "Records" will show that patient's medical records when clicking on it, "Edit" will open a new page with a form auto filled with the patient's information that can be edited. "Delete" will delete that patient from that doctor's database. Another page the specialist has is "Profile" and "Timetable". "Profile" will contain the doctor's information and the possibility to edit them. "Timetable" will contain the doctor's timetable for that week. Also for each page there will be a "Search" button to search for appointments, patients, records etc.

SCENARIOS:

1. Sign in
 2. Add new appointment
